

## **First BNSS Cadaver Workshop**

On Friday March 30th 2012 the BNSS organised its first cadaver workshop for neurosurgical residents in the excellent anatomy facility of the university of Liège. The topic of the workshop was the instrumentation of the lumbar spine. Twenty-six Belgian residents registered for this free educational event, which consisted of a morning session of lectures and an 4 hands on sessions in the afternoon in which pedicle screw, PLIF, TLIF and ALIF techniques were trained by experienced staff. The organisers greatly thank the sponsors of this event: Depuy Spine, Medtronic, Siemens, Stryker, Synthes and Zimmer.
